Event Management CRUD with Poster Upload and File Validation

Theory :

1. **Are add, update, and delete functionalities implemented correctly?**

   Answer: Yes, users can add, update, and delete event records correctly.

2. **Is the UI linked with the database correctly?**

   Answer: Yes, the user interface is connected to the database using PHP and MySQL.

3. **Are poster uploads validated for type and size?**

   Answer: Yes, poster uploads are validated to allow supported file types and sizes.

4. **Are success and failure messages displayed?**

   Answer: Yes, appropriate success and failure messages are displayed after each operation.

Challenges Faced: I faced difficulties in implementing event CRUD operations using PHP and MySQL. I struggled with uploading event posters

and validating their file type and size. I also faced challenges in connecting the UI with the database and displaying appropriate messages.

Learning Outcome:- I learned to add, view, update, and delete event records using PHP and MySQL. I understood how to upload posters with proper file type and size validation. I also learned to connect the UI with the database and display success or failure messages.
